

REYYA SUNIL

ABOUT ME

I am Sunil, a motivated and self-driven Java developer with a strong foundation in core programming concepts such as OOP, file handling, and exception handling. I enjoy building practical projects to strengthen my problem-solving skills and understand real-world application development. I am eager to start my professional journey where I can contribute, learn, and grow as a software developer.

EDUCATION

Intermediate| 2022–2024

I completed my Higher Secondary Education (MPC) from Sri Chaitanya Junior College, where I achieved an overall percentage of 90.9%. This academic background helped me build a strong foundation in mathematics, logical thinking, and problem-solving skills.

Sandip university| 2024–2028

I am currently pursuing a B.Tech in Artificial Intelligence and Machine Learning from Sandip University, Nashik. Through this program, I am developing skills in programming, data analysis, and machine learning concepts, along with hands-on experience in building practical applications and solving real-world problems.

PROJECTS

Restaurant Billing System (Java, OOP, UML Design)

Developed a console-based Restaurant Billing System using Java, implementing core OOP concepts like abstraction, inheritance, and encapsulation. Designed a UML class diagram with interfaces and abstract classes to model real-world billing operations. Implemented features such as item selection, bill generation, tax and discount calculation, and multiple payment handling.
